

Case Study

The Catch

A Seattle-based aerospace client was developing a cloud-based enterprise application to consolidate 3 legacy applications. They needed Project Management for all 16 development teams.

What Makes Form 100 a Trusted Advisor

Form 100 prides itself on being a team of dependable, dedicated, and disciplined consultants. We leverage our military leadership experience to help clients identify and solve their biggest frustrations with software development value streams. Offering professional services that range from agile coaching to implementations and from staff augmentation to training, our team is equipped with the right skillset to maximize clients' software portfolio value.

After gaining insights from the client and key stakeholders, we distilled these critical outcomes:

Increase communication

Develop processes

Foster discipline

The Solutions

We created a project org chart, so everyone understood where decisions were being made. Our team also created a context diagram outlining the architecture and database communication flow. The technical and business teams now had a common diagram to talk through delays. We created a sprint calendar with blue "Jenkins Smiley Faces" on every day the automated suite passed and highlighted any delays. We then started to track team level metrics on adherence to those standards on a sprint by sprint basis.

The Results
