

Case Study

The Catch

A Seattle-based airline funded an initiative to mobilize their employees by moving functionality to an iPad-based application. The team was having issues getting new features completed, deployed and into their employee's hands.

What Makes Form 100 a Trusted Advisor

Form 100 is proud to be a team of dependable, dedicated, and disciplined consultants. We leverage our military leadership experience to help clients identify and solve their biggest frustrations with software development processes. Offering professional services to help organizations with agile implementations, team training, and staff augmentation, our team is equipped with the right skillset to maximize your software portfolio value.

After gaining insights from the client and key stakeholders, we identified three critical outcomes:

Increase
deployment
frequency

Effectively
prioritize
features

Measure
business
results

The Solutions

We focused on three main areas to improve the flow of features into production: Agile development practices, Product backlog organization, and roadmap readiness process.

We were able to succeed by observing the team, tracking data, and providing solutions tailored to solve specific problems. More importantly, we were able to implement changes which became a part of the team culture and will persist after our team leaves the organization.

The Results

Reduction in
program delays

Retirement of
Legacy System

More Deployments
