FORM 100 CONSULTING
DEPENDABLE. DEDICATED. DISCIPLINED

Case Study

The Catch

A Seattle-based aerospace client developed a cloud-based enterprise application to consolidate 3 legacy applications. The organization needed SAFe Release Train Engineering and Project Management support for 16 development teams.

What Makes Form 100 a Trusted Advisor

Form 100 is proud to be a team of dependable, dedicated, and disciplined consultants. We leverage our military leadership experience to help clients identify and solve their biggest frustrations with software development processes. Offering professional services to help organizations with agile implementations, team training, and staff augmentation, our team is equipped with the right skillset to maximize your software portfolio value.

After gaining insights from the client and key stakeholders, we identified three critical outcomes:

Develop Processes to reduce dependencies

Increase Communication practices and flow

Drive alignment and process buy-in

The Solutions

We created a project decision chart to drive alignment to where decisions were being made. Our team developed a context diagram outlining the architecture and database communication flow to foster communication and allow the technical and business teams to talk through delays. We created a sprint calendar with "Jenkins Smiley Faces" to track automated testing success rates and highlight delays. We worked with the leadership to identify the right metrics to provide the most actionable metrics for program success.

The Results

Increased Deployments

Improved Feature Delivery and Requirements Gathering
