Meet Form 100 Consulting

As a team of former military leaders who are experts in agile software development processes, we apply years of military leadership experience to build high-performing software programs that deliver measurable value.

By embedding Leaders at the team level, we help software programs drive alignment, improve communication, and optimize processes to maximize business value.

Leadership + Agile Expertise = Results

In both the public and private sector, we created high-performing software development teams and programs by leveraging years of experience leading teams, running software programs, and solving real-world problems.

We partner with clients to instill the agile mindset and develop best practices that result in measurable business outcomes and long-term success.

Agile is a Team Sport.

Programs succeed or fail on the strength of their teams.

Services

Agile Coaches/Release Train Engineers

Our team of coaches have years of experience running large scaled agile programs. They utilize this experience to provide you with the solutions to manage your program.

Product Owners/Business Analysts

Our Certified Product Owners and Business Analysts excel at helping programs build world class technology products. They build stakeholder relationships to identify the highest value features to maximize product value delivery.

Scrum Masters

Servant leadership is the core tenant of military leaders, and our Certified Scrum Masters bring real-world leadership experience to your teams and programs.

Technical Project Managers

From conception to release, our Technical Project Managers expertly facilitate delivery of technology projects by defining requirements, determining scope, and meeting established key milestones.

Trainers

We train teams and organizations on Agile practices, Product Management, and optimizing communication.
